

Comaea Sprint Update – Summary – 10.11.3

Date of issue: 31 March 2022

Learning Catalogue Items Availability. (New controls and selection.)

Comaea reference - Jira 9159

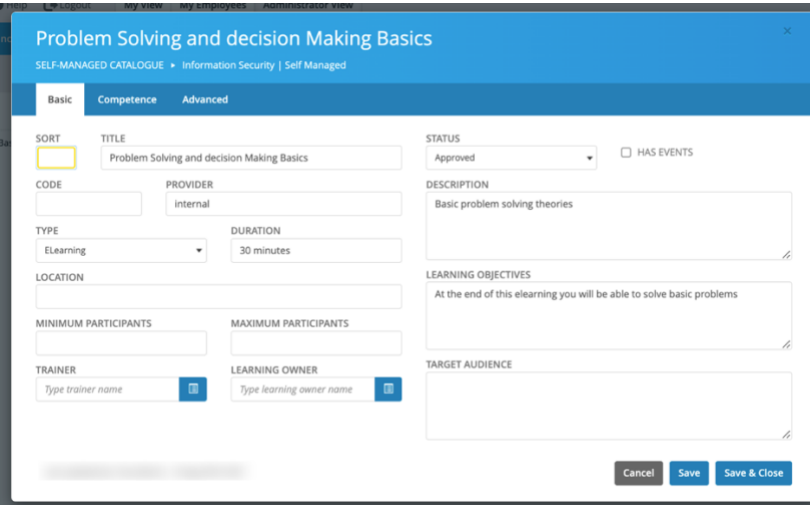

We are providing you with the ability to manage the Availability of ‘Learning Objects’ from your ‘Learning Catalogue’.

You will be able to make the ‘Learning Objects’ Available to specific ‘*Job Profile(s)*’ and/or ‘*Organisation Units*’.

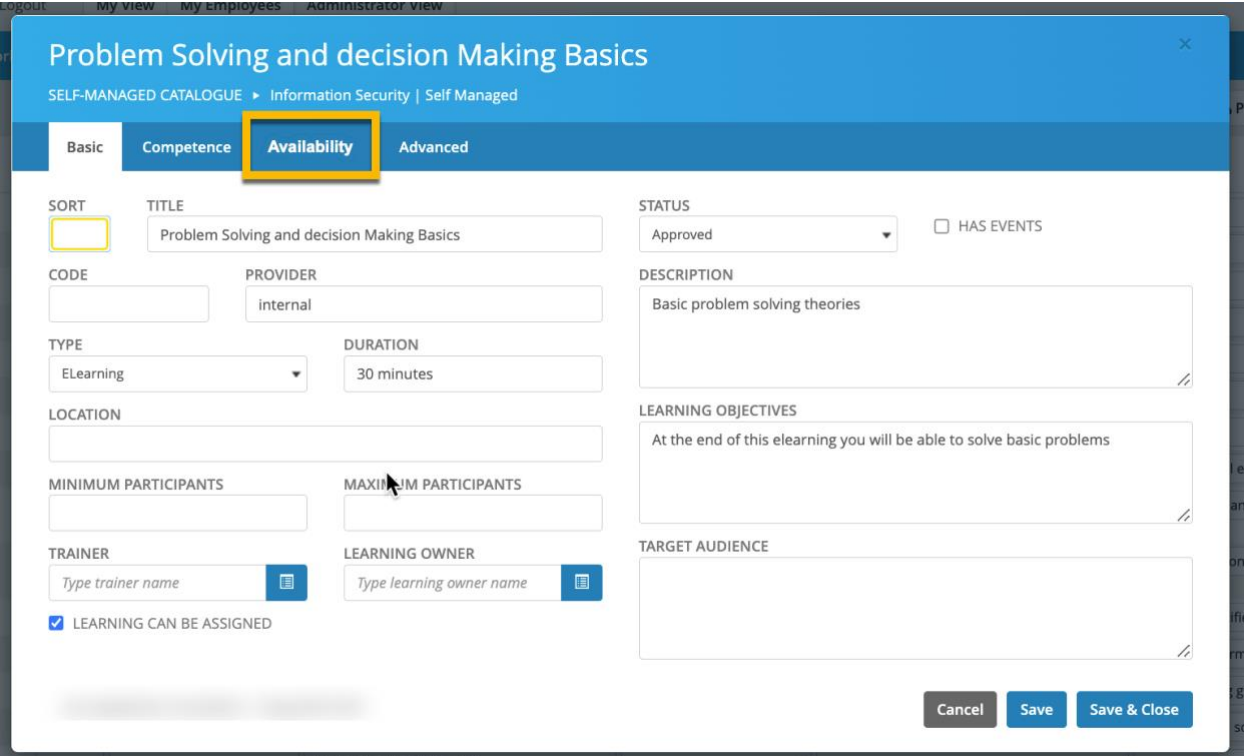

This will give you even greater control over your Learning Catalogue and Objects, which will be particularly powerful in multi-tenant-accounts. For example, where there may be more than Learning Object with the same title but have a different deep-links to your LMS or intranet link for each – you will now be able to make LO’s Available to the specific Job Role and/or Organisation Unit if required.

- **Customer Pre-deployment Testing:**
 - Available in REG-NR from Wednesday 6th April.
- **Planned Sprint Deployment:**
 - Tuesday 12th April evening.

Current functionality:

New 'Availability' tab and Controls:

Problem Solving and decision Making Basics

SELF-MANAGED CATALOGUE > Information Security | Self Managed

Basic Competence **Availability** Advanced

Who is my Manager? (New feature)

Comaea reference: Jira 9221

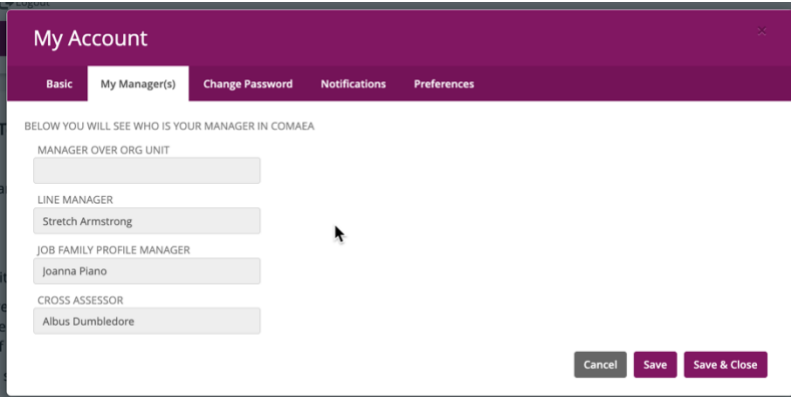

We are adding a new tab to 'My Account' for all system users. This tab will show you who is your 'Line Manager', 'Organisation Manager', 'Job Family Manager' (HoP) etc. This will provide all users with the ability to check who will be reviewing their Job Role Profile and supporting them with their Development.

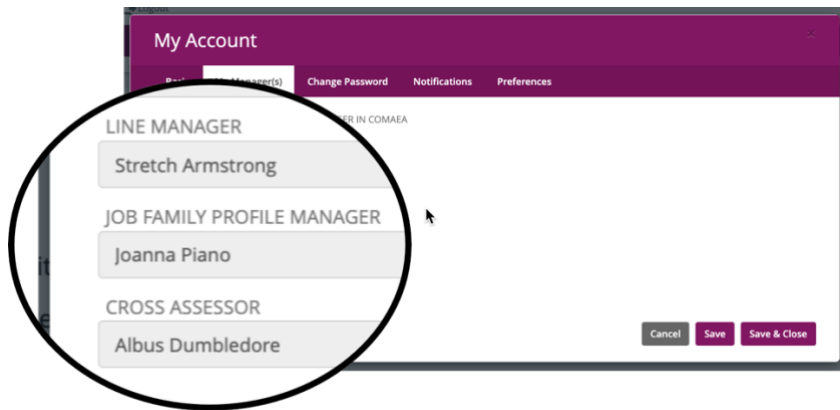

- **Customer Pre-deployment Testing:**
 - Available in REG-NR from Wednesday 6th April.
- **Planned Sprint Deployment:**
 - Tuesday 12th April evening.

Current feature:

New 'My Manager(s)' tab with sample data – which will vary depending on your HR data, and Assessment Workflow:

If you have any questions regarding these items, please contact Tony Martin or Neil Bassett.

For access to our test site REG-NR please contact me directly:

Neil Bassett.
